Art Unit: 1641

Applicant's election of Group I (claims 1-12) in Paper No. 5 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-12 are rejected under 35 U.S.C. 102(a) as being anticipated by Rice et al. (U.S. Patent 5,770,099).

Rice et al. teach a method wherein a substrate is etched at a first portion, and a first temperature; while an etch preventing polymer covers the portion of the film to be etched subsequently, at a second temperature. Temperatures vary such that the first temperature may be higher or lower than the second temperature. First or second portions of substrate may be etched first.

Vinogradov et al. (U.S. Patent 5,965,034) is cited as of interest.
